Subject: RE: Sample Summary Table 20150813 - R8 Sediment and Potable Water

For sediment:

All results fall below the recreational screening levels.

Here are some quick stats on the data:

Arsenic results range from 3.69-9.31 mg/kg

Lead results range from 86-496 mg/kg (all but one sample fall below 400)

Mercury ranges from 0.01- 0.05

Thallium had 2 detects (1.74 and 1.91 mg/kg) and 9 NDs.

I will now look at potable water. Call me if you need more info or anything specific evaluated.

Subject: FW: Sample Summary Table 20150813 - R8 Sediment and Potable Water

All,

Here is the validated R8 sediment and potable water data for your review. Terry, this is going to you at the same time as Deb, so please understand that this has not yet undergone review here at Area Command.

Thank you
Chris

Subject: Sample Summary Table 20150813

Attached you can find the summary of validated analytical data through 8/13/2014.

NOTE: for R8 Potable Water and Sediment Analytical data has been added to the delivery in addition to the Surface Water.

Thanks

Janine Polinko Latham
